EXPERIENCE

IT Projects: Portfolio
Junior Front-end/JavaScript Developer | since 2023

- Portfolio of an architect: a website featuring the work of an architect. Constructed using Vanilla JavaScript, the site communicates with an API, allowing for dynamic content updates.
- Kasa Apartments: front-end of an apartment rental platform. Using React Router for navigation and styled with SCSS, the app is enhanced with custom elements, such as a carousel slider.
- Vieux Grimoire Books: back-end of a book rating website. Using Express.js to implement a REST API and MongoDB to stock the data, the app is protected according to OWASP security guidelines.
- My portfolio website: a dynamic landing page showcasing my works as a web developer. Crafted with React Styled Components and featuring some CSS animations and Ant Design components.
